IT'S WHO WE ARE

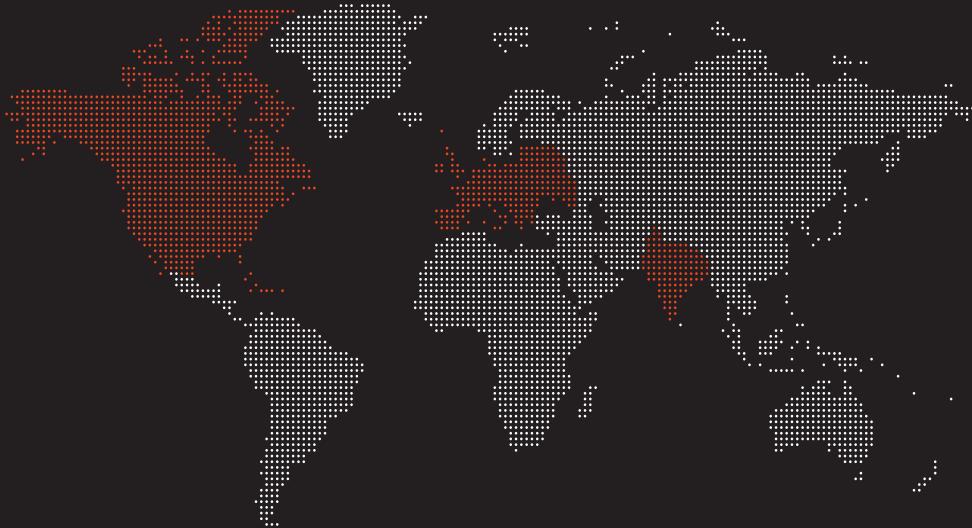

CyberPowerPC is a global leader in custom computing solutions and we are bringing that expertise directly to you. Every system is assembled by our skilled engineers in our warehouse based in the UK, tested for peak performance, and backed by award-winning service. We work with the industry's top brands to ensure your build delivers next-gen power without compromise.

25+ YEARS EXPERIENCE

For over 25 years, CyberPowerPC has been at the forefront of providing high performance, custom-built computing solutions. We understand that in the dynamic world of education, technology needs to be a seamless enabler, not a source of complexity. That's why we don't just build PCs; we deliver future-proof IT infrastructure designed to enhance teaching, support complex research, and engage every student.

Our reputation is built on the foundation of an expert, dedicated in-house team. This includes our expert PC builders, who meticulously construct every system, and our dedicated support crew. This team is your single point of contact, equipped with the technical and sector-specific knowledge to advise on specifications, manage seamless deployments, and provide ongoing technical assistance.

GLOBAL PRESENCE

CyberPowerPC operates across 11 different markets. These include:

- USA
- Canada
- UK
- Germany
- France
- Italy
- Spain
- Sweden
- Poland
- Netherlands
- India

Our global presence stems from our quality products and services. We are a world leading custom PC manufacturer, trusted by gamers, businesses and institutes worldwide as one of the top names in custom-built PCs.

Trusted Partners

To craft the perfect solution, we start with premium components. Our systems are engineered using hardware exclusively from the world's most respected technology leaders. These partnerships allow us to bring you the latest architecture and enterprise-grade stability, all while keeping our pricing highly competitive. Real brands, real performance, and total peace of mind.

Our partners include but aren't limited to:

UK Reviews

We're proud to provide our customers with an outstanding PC buying experience, ensuring they enjoy engaging with us as much as they enjoy their PC. Both our B2B team and Customer Service team are on hand to help with any questions or queries you may have, further providing an exceptional service to you and your organisation.

Trusted by

We supply top of the range PCs for a range of clients both in the education sector, across the public sector and beyond. We are proud to provide these businesses with hardware that keeps them competitive and allows them to nurture the next generation of talent.

Why Choose CyberPowerPC?

Our 40,000 sq ft warehouse allows us to manage a large influx of orders ensuring that our customers receive their PCs in a timely manner, and even next day.

With a capacity to manufacture over 100,000 systems per year, our warehouse allows us to handle all aspects of the business, from beginning to end.

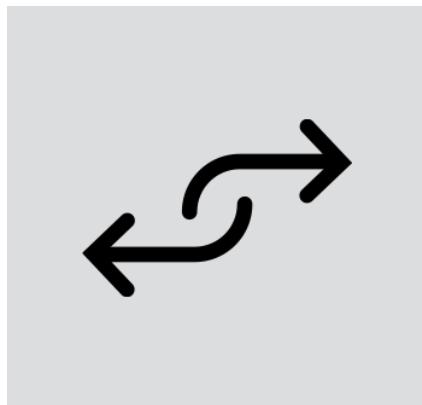

Personalisation

When you reach out to CyberPowerPC, you get a dedicated account manager who will be your main point of contact right from the start. Your account manager will help realise your project, answer any questions and make sure you have the smoothest experience possible integrating your new systems in to a new or existing workflow.

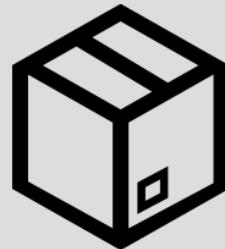

Flexibility

We offer customisable specifications for all our PCs to meet the demands of the customer and what task they are wanting to perform. Whether that's general day to day word processing all the way up to, and not limited to, large scale AAA game production. From PCs to servers, no matter the task we have the hardware for you.

Stock

We have direct accounts with industry leading vendors, with our stock being sourced from the USA, Europe and Asia. Every system we build undergoes a rigorous, multi-stage quality control process to ensure peak performance and stability. From individual component stress testing to comprehensive thermal benchmarking, our technicians leave nothing to chance.

Warranty

On top of everything we provide assurances that make sure your systems are performing well in to the future with a standard 3 years parts, 5 years labour warranty and a lifetime of technical support.

This is upgradeable to onsite warranty for the B2B, Edu and Public sector.

Lead time

All of our systems are manufactured in the UK. Depending on current stock levels and order volume, lead time can be as early as next day. We work with reputable couriers to make sure your systems are delivered safe and swift, whether you are in the UK or overseas.

Testimonials

While we can tell you about the quality of our work ourselves, the most meaningful measure of our success comes from the businesses we support.

These stories aren't just compliments, they're social proof of what we do and the value you can expect when you choose to work with CyberPowerPC.

"CyberPowerPC have been an absolute pleasure to work with, upgrading our Games and Media departments with fantastic hardware and going the extra mile to ensure we have had a customer service experience that has been second to none."

- Martin Herron

"Our main focus was the Level 4 Games Development room, now fitted with the latest high-performance hardware built to handle: immersive games development, including VR projects and simulations; Esports games on ultra; AI and creative workflows; and content creation for our new immersive room. Thank you CyberPowerPC for building these awesome machines!"

- Mark Dudley

Priestley College Production

One of our recent successes was working with Priestley College to provide the institute with 148 small form factor (SFF) PC bundles followed by 110 All-in-One (AIO) PCs, which highlights our capacity for large, complex deployments.

The challenge lay in staging and configuring a total of 258 machines, from coordinating the SFF components to custom imaging all units in a demanding timeframe.

Crucially, our team of dedicated builders and support staff ensured every unit was prepared, tested, and delivered perfectly to the client.

This effort directly supports the next generation by providing hardware that works at their speed, allowing them to thrive and focus on their education without being slowed down.

“It was a pleasure working alongside Priestley College, working to supply them with 148 Small Form Factor PC bundles and again, providing them with 110 All-in-One PCs. We’re proud to have been involved in the process of upgrading Priestley College’s IT systems with reliable, high performance systems.”

(Shape the Future)

We take immense pride in every machine we build. We are dedicated to providing our customers with powerful systems, meticulously crafted to meet intensive hardware needs. Beyond performance, we ensure every system is aesthetically pleasing, delivering not only raw power

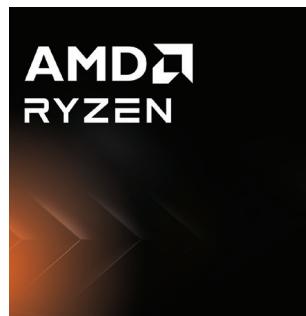

but also beautiful systems designed for reliable operation. We remain committed to fully supporting our customers through every step of their journey, guaranteeing satisfaction and peak operational capacity.

Workstation

For professional users demanding maximum power, our business PCs feature cutting-edge performance hardware. We integrate professional-grade graphics cards, including NVIDIA RTX Pro series, ensuring superior visual performance and rendering capabilities for demanding applications. For processing, we offer premium CPUs such as AMD Threadripper and EPYC for core-heavy workloads, alongside highly reliable Intel Xeon processors, providing the necessary computational backbone for intensive operations.
